# AQUARIUM MAR DEL PLATA, RESCUES AND REINTRODUCES 3 SEA LIONS BACK TO THE SEA

The Marine Fauna Rehabilitation Center, which is based in Aquarium in Mar del Plata, Argentina, recently rescued 3 Sea Lions, whom they named Santi, Guille, and Dani.

Santi was rescued at Waikiki Beach in November 2018. His conditions were complicated, he had very low weight and an atypical molt that compromised his health. Guille is an adult Sea Lion who had a major infected wound and was rescued in Puerto Beach in November and finally, Dani, the smallest of the three, had very low weight.

Due to the proper care that the Veterinarians and Marine Mammals Specialists gave to these three Sea Lions, they were able to recover fully and reach optimal conditions. Thanks to our knowledge and experience, we are able to help Marine Mammals in the wildlife.

**On March 1st, the reintegration of these 3 Sea Lions on the Aquarium beach was carried out.**

For this new season, Zoomarine opened 3 new attractions. Zoonipista, an ice rink where you can practice your best pirouettes and shock your family! A new Habitat was also opened called Garden of the Lemurs, where you have the opportunity to interact with these fascinating species and finally the Punta Cana Pool where you can relax and get a dose of Vitamin Sea.

Currently, **Zoomarine has more than 40 attractions,** enough for you to have a spectacular day!
